#### 1. Overview

The Multiview Video Processor is a simple, cost-effective video scaler designed to enable a true 4K@60Hz UHD, HD, SD video display device, virtually handling any input resolution up to 4K@60Hz. It provides 4 HDMI inputs, 1 VGA input, 1 DisplayPort input, 1 analog audio input, 1 HDMI output and 1 DP loop out.

#### 2. Features

- Support 4K@60 dual display output, the primary display does full screen/PIP/POP/multi-view and secondary display does full screen.
- Support 14 different screen layouts including 6 preset screen layouts and extra 8 customized screen layouts
- Support input resolution up to 4K@60Hz, 4:4:4 color sampling
- Support output resolution up to 4K@60Hz, 4:4:4 color sampling
- Support upscaling up to 4K@60Hz, 4:4:4 color sampling
- Support Deep Color and HDCP 1.4/2.2
- Fast switching between input channels or screen layout modes
- Rotation R90°/L90° or flip output in full screen layout
- Receive Dolby Digital® 5.1, DTS® 5.1 and uncompressed 7.1 linear PCM audio includes stereo analog audio input
- Support stereo audio output
- Support front panel button, IR remote control, RS232/TELNET and Web UI control
- Support USB port firmware upgrade

## 3. Specifications

MODEL NO.	Multiview Video Processor
INPUT	4 x HDMI 2.0 with locking 1 x DP 1.2 1 x VGA Audio R/L
OUTPUT	1 x HDMI 2.0 with locking 1 x DP 1.2 Audio R/L
CONTROL	Front panel buttons IR remote control RS232/TELNET Web UI
FIRMWARE UPGRADE	1 x USB 2.0
VIDEO OUTPUT RESOLUTION	4096 x 2160@60Hz, 4:4:4 color sampling
ETHERNET PORT	1 x RJ45
LED INDICATOR	INPUT, blue backlight LAYOUT, blue backlight INPUT SWAP, blue backlight PANEL LOCK, blue backlight STANDBY on, red backlight STANDBY off, green backlight
POWER SUPPLY	DC 12V/2A, locking barrel connector
POWER CONSUMPTION	15W
ENVIRONMENT	Operating temperature0 $^{\circ}$ C ~ 45 $^{\circ}$ COperating humidity20~90% RHStorage temperature-20 $^{\circ}$ C ~60 $^{\circ}$ C
DIMENSION	440.4 x 230 x 45 mm (L x W x H, standard1U)
WEIGHT	2.72 KG

#### 4. Hardware Descriptions

#### 4.1 Product Appearance

No.	Feature	Description
1	Rack Mount Bracket *	Attach the bracket to the left side of the system chassis for rack mount installation
2	Front Panel	Control Multiview Video Processor or directly via the front panel push Buttons
3	Rear Panel	Connect Video and Audio signal via rear panel input connectors
4	System Chassis	Black metal housing and the size is 1 rack unit
5	Rack Mount Bracket *	Attach the bracket to the right side of the system chassis for rack mount installation

\* Rack Mount Bracket: 4 screws per bracket are screwed on the unit in advance when the Multiview Video Processor is assembled. There are spare screws included in the package as accessories to screw the bracket.

## 4.2 Front Panel

No.	. Feature		Description		
1	IR Receiver		Receives signals from the remote control transmitter		
2		HDMI1	Press to select the HDMI 1 input in full screen Press to select HDMI 1 audio in multi-view screen		
3		HDMI2	Press to select the HDMI 2 input in full screen Press to select HDMI 2 audio in multi-view screen		
4	INPUT*	HDMI3	Press to select the HDMI 3 input in full screen Press to select HDMI 3 audio in multi-view screen		
5		HDMI4	Press to select the HDMI 4 input in full screen		
6		DP	Press to select the DP input in full screen Press to select DP audio in multi-view screen		
7		VGA	Press to select the VGA input in full screen Select "VGA" for audio in multiview mode		
8			Press to select Layout A (full screen mode)		
9		⊞	Press to select Layout B

11	Set	Green	Set output resolution to 3840x2160@30Hz		
	201	Yellow	Set output resolution to 1920x1080@60Hz		
		Blue	Set output resolution to 1280x720@60Hz		

\* Please see Appendix 1 and Appendix 2

#### 5. Installation

### 5.1 Wiring Diagram

Do the following steps for device connections.

- a. Connect a HDMI source to the HDMI 1 input connector.
- b. Connect a HDMI source to the HDMI 2 input connector.
- c. Connect a HDMI source to the HDMI 3 input connector.
- d. Connect a HDMI source to the HDMI 4 input connector.
- e. Connect a DP source to the DP input connector.
- f. Connect a VGA video source to the VGA D-sub 15 pin input connector.
- g. Connect an audio source to the audio input connector.
- h. Connect the HDMI output connector to a HDMI display device
- i. Connect the DP output connector to a DP display device
- **j.** Connect the audio output connector to the audio amplifier, as required.
- k. Connect the 12V/2A adapter to 12V DC connector.

#### 5.2 Rack Mount Installation

Take the following steps to attach the two brackets to the system chassis and install into rack.

- a. Remove all cables and power supply before mount the Multiview Video Processor in the rack
- b. Place the system chassis on a sturdy surface
- **c.** Attach bracket to the left side of the system chassis by using the screw driver and four screws
- **d.** Attach the other bracket to the right side of the system chassis by using the screw driver and four screws
- e. Use your tape measure and level to ensure that the supporting shelf and the chassis are installed straight and level
- f. Make sure that your path to the rack is unobstructed.
- g. Slide the unit into the rack and position using the attached L brackets so that the slots in the brackets are positioned over the appropriate mounting holes in the side rails of the rack
- h. Securely fasten the unit into the rack by using the four screws which are supplied with the rack mount kit, installing two of the screws on each side of the unit. Use a screw driver to tighten the screws on each side of the unit.

## 6. Configurations

#### 6.1 Front Panel Buttons

Please see the section 4.2.

#### 6.2 Front Panel Buttons

Please see the section 4.4

## 6.3 Web UI

You can connect the Ethernet directly from PC to Multiview Video Process.

Please follow below steps to configure your PC Ethernet setting.

## 6.3.1 Directly Connect to PC via Ethernet Cable

- a. Click Start > Control Panel > Network and Sharing Center
- b. Click "Change Adapter Settings"
- c. Highlight the network adapter you want to use to connect to the device and click "Change Settings" of this connection. The "Local Area Connection Properties" window for the selected network adapter.
- d. Highlight the Internet Protocol Version 4 (TCP/IPv4)
- e. Click Properties. The Internet Protocol Properties window is relevant to your IT system.
- f. Select "Use the following IP Address for static IP address" and fill in the details. For TCP/IPv4 you can use any IP address in the range 192.168.1.1 to 192.168.1.255 (excluding 192.168.1.202).
- g. Subnet mask fills in 255.255.255.0.
- h. Click "OK".

Internet Protocol Version 4 (TCP/IPv4)	Properties ? 💌
General	
You can get IP settings assigned auton this capability. Otherwise, you need to for the appropriate IP settings.	natically if your network supports ask your network administrator
Obtain an IP address automatical	ly
Use the following IP address:	
IP address:	192.168.1.2
Subnet mask:	255 . 255 . 255 . 0
Default gateway:	1
Obtain DNS server address autom	natically
Ouse the following DNS server add	fresses:
Preferred DNS server:	· · ·
Alternate DNS server:	•••
Validate settings upon exit	Advanced
	OK Cancel

 After doing the steps from a. to h. successfully, you can click into Web UI by typing the 192.168.1.202 IP address in IE or Chrome.

## 6.3.2 Ethernet Hub or Router

At first, please follow section 6.3.1 and open web browser then follow 6.3.3 to set the Ethernet type to DHCP. You can connect the Ethernet port of the Multiview Video Process to the Ethernet port on a network hub or network router, via an Ethernet cable with RJ-45 connector.
